DETAILED ACTION

The remarks, declaration under 37 CFR 1.131, and amendment filed December 7, 2006 have been entered. Claims 29, 30, 52, 56, 59, 70, and 71 have been amended. Claims 29, 30, 33-49, 52-72 are pending and under current examination.

The declaration filed on 12/7/06 under 37 CFR 1.131 is sufficient to overcome the *Newby* reference.

Unless otherwise indicated, previous rejections that have been rendered moot in view of the amendment to pending claims and the declaration will not be reiterated.

Claim Objections

Claim 29 is objected to because --the TM-- should be inserted in place of "TM-" in line 6.

Claim 30 is objected to because --graft-- should be inserted before "failure" in line 2, and --the TM-- should be inserted in place of "TM" in line 6.

Claim 33 is objected to because --the introducing-- should be inserted in place of the second "method" in line 1.

Claim 34 is objected to because the undefined acronym, "APC".

Claim 52 is objected to because --the TM-- should be inserted in place of "TM" in line 7.

Claim 56 is objected to because --the TM-- should be inserted in place of "TM" in line 7.

Art Unit: 1633

Claim 59 is objected to under 37 CFR 1.75 as being a substantial duplicate thereof claim 29. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claims 63, 64, 65, 66, 67 are objected to under 37 CFR 1.75 as being a substantial duplicate thereof claims 54, 55, 56, 57, 58, respectively. When two claims in an application are duplicates or else are so close in scope or content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claims 35-45, 47, 48, 53-55, 57, 58, 61, 62, 68, 69 are objected to as being dependent upon an objected/rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 46, 49, and 60 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 46 recites the limitation "after step c". There is insufficient antecedent basis for this limitation in the claim.

Claim 49 recites the limitation "the engineered *vascular* graft of claim 48". There is insufficient antecedent basis for this limitation in the claim.

Claim 60 recites the limitation "the increased protein C activation in part b)". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 70-72 stand rejected under 35 U.S.C. 103(a) as being unpatentable over *Vassalli et al* (Cardiovasc Res 1997;35:459-69), in view of *Soares et al* (J Immunol 1998;161:4572-82), for reasons of record and following.

In the remarks, the applicant asserts that they have shown that they invented the claimed methods prior to the publication of *Soares et al*.

In response, it is noted that *Soares et al* was published more than one year prior to the instant priority date. The applicant is reminded prior invention may not be established under 37 CFR 1.131 if the rejection is based upon a statutory bar. Thus, the declaration is insufficient to overcome the *Soares* reference.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
